

Testimonial for StarTech Group, Inc.

I became a client of StarTech over five years ago when my IT provider closed. At that time, I made the decision to link my two offices with a centralized server and contacted Star Tech at the recommendation of a colleague. I was very concerned about finding a computer service which was meticulous and extremely detail oriented since I had computer service in the past that were not, they would come and fix a problem, leave and another problem would immediately crop up!

My experience with Jim Scalise and his team at Dental Tech has been gratifying. We were committed to moving to a chartless office, had to be able to move large amounts of digital imaging as well as data and do so quickly and reliably. Jim Scalise set up the inter-office networks, the centralized server, the firewalls, all the work station computers, the data backup, software purchases, licenses, and installation.

Everything worked very well from the beginning and any problems that arose were addressed quickly. I believe we have a very high level of reliability and we have had far more problems arise from the internet provider than from any equipment or set up issues! We are now getting ready to upgrade our firewalls and I am using Dental Tech again. They are thorough and meticulous, and I rely on having my data on hand when it is needed.
